Picture Courtesy: [Pixabay] The law of interaction is the name given to Sir Isaac Newton's third law of motion, which holds that an "interaction" between two objects brings creates an equal and opposite reaction. Objects Interacting In any instance where there are two objects, and they interact with the other, it is defined as exerting force upon the other. For instance, you exert your body downward toward sitting on a chair, then you sit in your chair, which places an upward force on your body. That's the law of interaction — the two forces are at work — a force upon your body, and a force on the chair. Your body moving downward is the action force, and the chair is the reaction force. The law of interaction is defined by action and reaction. Interactivity in Motion The forces described by Newton's third law are either pushes or pulls resulting from an object's interactions. There are several interactions at play in the physics of motion. There are the immediate contact interactions, in which interactions between objects have direct contact. There are also distance interactions, in which the interaction happens without direct contact. You can see this interaction with magnets or electricity. The Law of Interaction in Nature Nature holds many examples of the law of interaction. Think about the birds in the sky and how they fly. As the bird pushes down with its wings on the air, there is an opposite reaction for the direction of the air force on the bird. These forces are the mutual interactions. This action and reaction force in pairs gives birds the ability to fly. On the ground, we see a tiger in nature. When the tiger runs forward, its paws exert a backward motion force upon the ground. When this occurs, the ground exerts its own equal and opposite force on the tiger, helping to propel it forward, faster. The Law of Interaction in Daily Life You can see the law of interaction in your daily life as well. When you are on the golf course, you swing the club down upon the golf ball. However, there is also an opposite force of the ball hitting the club. When the action and reaction occur, the ball flies forward in the direction it was hit. A bicycle ride is also an example of the law of interaction. The feet push the pedals, which exerts a force upon the chain to make the wheels roll. As the tires roll, they interact with the pavement, which exerts its own equal and opposite force on the bicycle tires. This is the law of motion, moving the bike forward. Newton's Laws The third law of motion as defined by Newton follows on the first and second laws of how motion happens. Newton's first law of motion is also known as the law of inertia, and his second law of motion is the law of momentum. The first law postulates that an object that is in a rest or motion state will remain that way unless acted upon by an external force. Imagine a car that starts to accelerate quickly at a high rate of speed. When the acceleration starts, your body gets pushed backward in the car. The second law, also called the law of momentum, is focused on how an object's movement forward depends on the force acting upon the object. This means, for instance, that New York State divorce laws differ from the laws of any other state. In spite of this, there are general terms that apply across all states. The following information explains the similarities.No-Fault Divorces Blame Neither PartyIf you and your soon-to-be ex can agree to file a no-fault divorce, you may be able to move the divorce along a lot quicker. With a no-fault divorce, only one of you needs to state a reason for the divorce that will satisfy the state. These include reasons like "irreconcilable differences" and "incompatibility." You may live in a state where the law requires that you both live separately for a few months before you're approved for a "no-fault" divorce, so if you're trying to move the process along, find out what your state rules are asap.Some States Have Community Property SchemesLiving in a community property state is great for some people — and not so great for others. It all depends on your perspective. When the divorcing couple lives in a community property state, they're said to equally own the money and the assets earned by either party from the beginning of the marriage up until the date they officially separated. This includes everything bought during the marriage with community money. Some partners have issue with this because they believe they contributed more to the marital assets than their soon-to-be exes did.Equitable Distribution Is Fair But Not Always EqualEquitable distribution of assets means that all assets accumulated during the marriage are supposed to be distributed fairly. This is where things can get complicated. If one partner didn't actually earn money during the marriage but contributed to the marriage in other ways, the other partner may feel that they're entitled to more because they went to work for real. Included in equitable distribution are other considerations like child support determinations and alimony, which makes things even harder to divide.All States Have a Public Interest to Support ChildrenWhen it comes to protecting the rights of children, states try to place any children from the marriage in the custody of the parent who'll be able to provide the most stable environment. Regardless of the state, parents have to file parenting plans or come up with custody and visitation agreements via court intervention. This is an area that can get pretty dicey as people can become very passionate when it comes to their children.State Courts Have Jurisdiction Over DivorcesIf you want your divorce to go through quickly — and you don't have major assets to divide up or custody issues to contend with — get your paperwork through as quickly as you can. State courts set general timelines of a few months in order for a divorce to go through. This will allow for the petition to divorce to be rescinded if the couple reconciles. If you know for a fact that isn't happening, get that paperwork moving. Viola, having recently recovered from a breakdown resulting from her being "replaced" in her job as tv interviewer by a younger woman, is hell bent on preventing her son's marriage to a more dog walker. This becomes her "project".Not only is her son wide-eyed and innocent with respect to her character, but initially, so too is Charlie. Soon, however, Charlie begins to smell a rat. War is declared..... This film really had its moments. I haven't laughed out loud so much in ages. Jane Fonda and Jennifer Lopez worked very well together, but so too did Jane Fonda and her PA, Ruby (Wanda Sykes). Some of Ruby's lines were priceless: "If we get arrested, I'm gonna sing like a canary!" she exclaims as Viola (Fonda) takes drastic action in an attempt to avert her son's wedding.So, 5 stars from me.One person found this helpfulPaul RobertsReviewed in the United Kingdom on 05 February 2021Funny comedy that will have you in knots.Verified purchaseOne person found this helpfulRushmiReviewed in the United Kingdom on 13 January 2022This DVD was very funny.Verified purchaseKeith R.
